

The Council of Scientific and Industrial Research, CSIR-CFTRI (Central Food Technological Research Institute) has made protein rich biscuits for COVID-19 patients. The biscuits have been sent to the COVID-19 patients in AIIMS All India Institute of Medical Science).

**Highlights:**The CFTRI has so far supplied 500 kg of protein-rich biscuits. Also, another 500 kg of protein-rich rusks have been supplied. The usual biscuits contain 8% to 9% of protein. However, these enriched biscuits and rusks contain 14% of protein.

**Significance:**The CFTRI has so far supplied 500 kg of protein-rich biscuits. Also, another 500 kg of protein-rich rusks have been supplied. The usual biscuits contain 8% to 9% of protein. However, these enriched biscuits and rusks contain 14% of protein. The CFTRI has so far supplied 500 kg of protein-rich biscuits. Also, another 500 kg of protein-rich rusks have been supplied. The usual biscuits contain 8% to 9% of protein. However, these enriched biscuits and rusks contain 14% of protein. The formula for preparing the biscuits was discovered by CSIR-CFTRI. It is to be manufactured by Seven Seas Private Limited.
